Text Classification Competition

Team:

Team Name:
reckoner
Members:
Sahil Rishi - sahilr2@illinois.edu
Individual Team Member -
Sahil was chosen unanimously as the captain of the team

Which competition do you plan to join?

Text Classification Competition
https://github.com/CS410Fall2020/ClassificationCompetition

Are you prepared to learn state-of-the-art neural network classifiers:

Yes, our team is keen on learning and using transformer models for classification. They have shown to be very efficient for classification and transfer learning allows training on low numbers of samples.
We plan to use the hugging face transformer library.

Previous Experience:
Previously we have used seq2seq transformer models, BART and Bert (Tensorflow).

Which programming language do you plan to use?

Python
